

Bryan S. Katz

Co-President / Co-Founder

Bryan comes from a fifteen-year background in web-site development, Internet applications, and custom software -- with just a little bit of artificial intelligence thrown in.

Unfortunately, he came to kioskStyle with the words: "Is this going to be another one of those 'good ideas', or do you want to actually spend some money and try." "Unfortunate" is exactly what it was -- because kioskStyle began by relieving both Perry and Bryan of a fairly sizable fortune.

Through three years of engineering and development, Bryan's persisted in his role of Ernie to Perry's Bert.

Content with exploring the limits of what's known, and creatively breaking through them, Bryan permitted Perry to focus on the details and precision (the fun stuff) of the business.

Bryan continues his self-sacrificing role, even today.

To kioskStyle, Bryan brings his programming skills, his creativity, and most importantly his enthusiasm (represented, in part, by his really-really-small yellow car).

"Rubber ducky, you're the one."

Amateur driver, closed course, do not attempt. Photo courtesy of TrackTimePhotos.com

Perry Feler

Co-President / Co-Founder

Perry's world of networks, hardware, systems & security, is still exciting after 15 years. As a consultant, he helps businesses apply and deal with technology on a daily basis.

A perfectionist with high standards, Perry came to kioskStyle frustrated and disappointed with a kiosk industry full of products that were underwhelming, out-dated, and just not good enough.

Three years later, it's still the same and he's still disappointed, but now one product is worthy of his respect - having had to build it from scratch, this one meets Perry's requirements.

As the resident details-guy, Perry only does things right - something Bryan finds really annoying. As Bryan's polar opposite, Perry brings his trademark organization, workmanship, and precision.

He also enjoys mocking Bryan's yellow "toy" car from the driver's seat of his far-more-practical SUV, and prefers yellow for sticky notes, highlighters, the occasional patch cable, and this shirt.

Pretty sure it was in Turkey. . . or Greece.
