Tricked-Out For Business™

Otherwise Impossible™

You develop software applications to suit
your clients' specific needs.

Your software is powerful, responsive,
modern, stable & well-designed.

Sometimes, it even looks good.

Then your client deploys it onto unreliable,
low-end & ugly machinery.

No longer.

kioskStyle kiosks enable you to
deliver better software: faster,
and without compromise.

kioskStyle

PORTABLE

mountable just about anywhere
even inside alternative enclosures †

inexpensive shipping, by car, by courier
or as check-in baggage by a single person †

POWERFUL

future friendly, repeatedly upgradable to support
the latest and greatest

production environment similar or identical
to your development environments †

flex your younger programmers experienced in
modern programming languages †

high-performance to distinguish your software
from your competitors †

PUBLIC

match each kiosk's exterior to its location's decor with myriad colours,
patterns, custom finishes, logo and branding artwork, easily cleaned

military-grade, durable aluminum construction, designed for reliable
high-traffic public usage

cool`n`quiet active ventilation for whisper-silent operation

- optional Core i7/AMD, alternative OS, discrete graphics
- optional 16GB DDR3, SSD / 6TB HDD
- optional ps/2, firewire, eSATA, 7.1 audio out

... TO KEEP UP WITH YOUR SOFTWARE

- stop compromising your software to run on inferior hardware
- stop programming in assembly to support slow hardware
- stop over-optimizing code to fit within antiquated envelopes
- stop porting code from modern workstations to legacy production environments
- stop deploying stunning software onto ugly machines
